

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1-2. (Canceled)

3. (Currently amended) ~~The method of claim 2~~ A method comprising:
providing an on-line, interactive network site including a personalized network
page from which a user can customize and personalize specifications for a three-dimensional
achievement recognition item, wherein the personalized network page includes a pre-populated
list of one or more achievements attained by the user, any of which the user can select for
customizing and personalizing an the achievement recognition item;
receiving information through the network site from the user, wherein the
information includes user-selected specifications for customizing and personalizing features of
the achievement recognition item for an achievement selected by the user from the pre-populated
list; and
producing the achievement recognition item in accordance with the user-selected
specifications.

4. (Currently amended) ~~The method of claim 2 including:~~ A method comprising:
providing an on-line, interactive network site from which a user can customize
and personalize specifications for a three-dimensional achievement recognition item;
providing to the user through the on-line interactive network site a sample image
of the achievement recognition item; ~~and~~
receiving information through the network site from the user, wherein the
information includes user-selected specifications for customizing and personalizing features of
the achievement recognition item;
updating the image, in response to receiving user input through the network site,
in accordance with the user-selected specifications for customized and personalized features of
the achievement recognition item; and
producing the achievement recognition item in accordance with the user-selected
specifications.

5. (Currently amended) The method of claim ~~[[2]]~~ 4 wherein the achievement
recognition item comprises text that reflects an achievement attained by the user.

6. (Original) The method of claim 5 wherein the achievement recognition item
comprises a document mounted on or embedded in a substrate, wherein the document reflects an
achievement attained by the user.

7. (Original) The method of claim 6 wherein the user-selected specifications include
a substrate material.

8. (Currently amended) The method of claim 6 wherein the user-selected
specifications include a color for the substrate ~~for a portion of the achievement recognition item.~~

9. (Original) The method of claim 5 wherein the user-selected specifications include text that reflects the achievement attained by the user.

10. (Original) The method of claim 5 wherein the achievement recognition item comprises an engraved plate mounted on a substrate, wherein the user-selected specifications include text to be engraved on the plate.

11. (Currently amended) The method of claim 10 wherein the user-selected specifications include at least one of the following: (i) type style size of the text and (ii) font size of the text.

12-13. (Canceled)

14. (Currently amended) ~~The system of claim 13~~ A system comprising:
a computer network;
a user device coupled to the network, the user device including a display;
circuitry coupled to the network to:
provide an on-line, interactive network site including a personalized
network page from which a user of the user device can customize and personalize specifications
for a three-dimensional achievement recognition item, wherein the personalized network page
includes a pre-populated list of one or more achievements attained by the user, any of which the
user can select for customizing and personalizing an achievement recognition item;
receive information through the network site from the user, wherein the
information includes user-selected specifications for customizing and personalizing features of
the achievement recognition item for an achievement selected by the user from the pre-populated
list; and
store the received information.

15. (Currently amended) ~~The system of claim 14 wherein the circuitry is configured~~

~~to:~~ A system comprising:

a computer network;

a user device coupled to the network, the user device including a display;

circuitry coupled to the network to:

provide an on-line, interactive network site from which a user of the user device can customize and personalize specifications for a three-dimensional achievement recognition item;

provide to the user through the on-line interactive network site a sample image of the achievement recognition item;

receive information through the network site from the user, wherein the information includes user-selected specifications for customizing and personalizing features of the achievement recognition item; and

update the image, in response to receiving user input through the network site, in accordance with the user-selected specifications for customized and personalized features of the achievement recognition item.

16. (Original) The system of claim 15 wherein the achievement recognition item comprises text that reflects an achievement attained by the user.

17. (Original) The system of claim 16 wherein the achievement recognition item comprises a document mounted on or embedded in a substrate, wherein the document reflects an achievement attained by the user.

18. (Currently amended) The system of claim ~~[[16]]~~ 17 wherein the user-selected specifications include a substrate material.

19. (Currently amended) The system of claim ~~[[16]]~~ 17 wherein the user-selected specifications include a color for the substrate ~~a portion of the achievement recognition item.~~

20. (Original) The system of claim 16 wherein the user-selected specifications include text that reflects the achievement attained by the user.

21. (Original) The system of claim 16 wherein the achievement recognition item comprises an engraved plate mounted on a substrate, wherein the user-selected specifications include text to be engraved on the plate.

22. (Currently amended) The system of claim 21 wherein the user-selected specifications include at least one of the following: (i) type style ~~size~~ of the text and (ii) font size of the text.

23-24. (Canceled)

25. (Currently amended) ~~The article of claim 24~~ An article comprising a machine-readable medium storing machine-executable instructions that, when applied to a machine, cause the machine to:

provide an on-line, interactive network site including a personalized network page from which a user can customize and personalize specifications for a three-dimensional achievement recognition item, wherein the personalized network page includes a pre-populated list of one or more achievements attained by the user, any of which the user can select for customizing and personalizing an achievement recognition item; and

store information received through the network site from the user, wherein the information includes user-selected specifications for customizing and personalizing features of the achievement recognition item for an achievement selected by the user from the pre-populated list.

26. (Currently amended) ~~The article of claim 24 including instructions that, when applied to the machine, cause the machine to:~~ An article comprising a machine-readable medium storing machine-executable instructions that, when applied to a machine, cause the machine to:

provide an on-line, interactive network site from which a user can customize and personalize specifications for a three-dimensional achievement recognition item;

provide to the user through the on-line interactive network site a sample image of the achievement recognition item; and

update the image, in response to receiving user input through the network site, in accordance with user-selected specifications for customized and personalized features of the achievement recognition item.

27. (Currently amended) The article of claim ~~[[24]]~~ 26 wherein the achievement recognition item comprises text that reflects an achievement attained by the user.

28. (Original) The article of claim 27 wherein the achievement recognition item comprises a document mounted on or embedded in a substrate, wherein the document reflects an achievement attained by the user.

29. (Original) The article of claim 28 wherein the user-selected specifications include a substrate material.

30. (Currently amended) The article of claim 28 wherein the user-selected specifications include a color for the substrate ~~a portion of the achievement recognition item.~~

31. (Original) The article of claim 27 wherein the user-selected specifications include text that reflects the achievement attained by the user.

32. (Original) The article of claim 27 wherein the achievement recognition item comprises an engraved plate mounted on a substrate, wherein the user-selected specifications include text to be engraved on the plate.

33. (Currently amended) The article of claim 32 wherein the user-selected specifications include at least one of the following: (i) type style size of the text and (ii) font size of the text.

34. (Canceled)

35. (Currently amended) The method of claim [[34]] 38 including receiving an achievement recognition item in accordance with the user-selected specifications.

36. (Canceled)

37. (Currently amended) ~~The method of claim 36~~ A method comprising:
accessing a personalized page of an on-line, interactive network site to customize
and personalize specifications for an achievement recognition item, wherein the personalized network page includes a pre-populated list of one or more achievements attained by the user, any of which the user can select for customizing and personalizing an achievement recognition item;
using the personalize page to select an achievement from among the one or more
achievements in the pre-populated list; and
entering information through the personalized page to order the achievement
recognition item, wherein the information includes user-selected specifications for customizing
and personalizing features of the selected achievement recognition item for the selected
achievement.

38. (Currently amended) ~~The method of claim 36 including:~~ A method comprising:
accessing an on-line, interactive network site to customize and personalize
specifications for an achievement recognition item;
receiving through the on-line interactive network site a sample image of the
achievement recognition item; ~~and~~
entering information through the network site to order the achievement
recognition item, wherein the information includes user-selected specifications for customizing
and personalizing features of the achievement recognition item; and
receiving through the network site an updated image that reflects the user-selected
specifications for customized and personalized features of the achievement recognition item.
39. (Currently amended) The method of claim ~~[[36]]~~ 38 wherein the achievement
recognition item comprises text that reflects an achievement attained by the user.
40. (Original) The method of claim 39 wherein the achievement recognition item
comprises a document mounted on or embedded in a substrate, wherein the document reflects an
achievement attained by the user.
41. (Original) The method of claim 40 wherein the user-selected specifications
include a substrate material.
42. (Currently amended) The method of claim 40 wherein the user-selected
specifications include a color for the substrate ~~a portion of the achievement recognition item.~~
43. (Original) The method of claim 39 wherein the user-selected specifications
include text that reflects the achievement attained by the user.

44. (Original) The method of claim 39 wherein the achievement recognition item comprises an engraved plate mounted on a substrate, wherein the user-selected specifications include text to be engraved on the plate.

45. (Currently amended) The method of claim 44 wherein the user-selected specifications include at least one of the following: (i) type style ~~size~~ of the text and (ii) font size of the text.
